SOHOM BHADURI

Aspiring Software Engineer | Full-Stack Development | Generative AI

Kolkata, India | bhadurisoham182@gmail.com | +91-7015229530 | LinkedIn Profile

PROFESSIONAL SUMMARY

Final-year **Computer Science Engineering** student skilled in **Java**, **JavaScript**, and **C**, with hands-on experience building and debugging full-stack web apps. Strong in **API development**, **payment gateway integration**, and **WordPress** customization, with growing expertise in **Generative AI** and **Prompt Engineering** using **Claude Code**. Quick learner and collaborative team player committed to clean, reusable code.

TECHNICAL SKILLS

Programming Languages: Java, **JavaScript**, **C**

Web & API Development: REST **API** design & integration, **Payment Gateway** integration, **WordPress** (plugins & themes), HTML5, CSS3, responsive design

AI & Emerging Tech: Generative AI, **Prompt Engineering**, **Claude Code**, **Google Cloud**

Tools & Debugging: Chrome Inspector, Firebug, Git/GitHub, VS Code, Postman

Core Competencies: Debugging & troubleshooting, code optimization, reusable component design, project planning & scheduling, agile collaboration

KEY PROJECTS

E-Commerce Platform with Integrated Payment Gateway *2025*

- Built a full-stack e-commerce web application using **Java** and **JavaScript**, integrating a secure **Payment Gateway** for end-to-end order processing.
- Designed and consumed **REST APIs** to connect client-side UI with server-side business logic, ensuring smooth data flow between modules.
- Built reusable UI and backend components to speed up feature development and simplify future maintenance.
- Used **Chrome Inspector** and browser dev tools extensively for debugging and performance troubleshooting across devices.

Custom WordPress Website with Plugin Development *2024*

- Developed and customized a responsive **WordPress** website, building custom plugins to extend core functionality for a client use case.
- Ensured optimal, mobile-friendly web design across devices to improve accessibility and user experience.
- Collaborated on project planning, setting timelines and tracking deliverables against milestones.
- Debugged cross-browser compatibility issues using **Firebug** and Chrome Developer Tools.

AI-Assisted Development Toolkit using Generative AI *2025*

- Explored **Prompt Engineering** techniques to automate repetitive coding tasks using **Generative AI** and **Claude Code**, cutting development time on boilerplate work.
- Deployed and tested workflows on **Google Cloud**, gaining hands-on exposure to cloud-based application hosting.
- Documented reusable prompt templates and coding patterns to support continuous learning and knowledge-sharing with peers.

EDUCATION

Swami Vivekananda University — **CGPA: 8.0**
B.Tech in Computer Science Engineering (CSE) — *Expected 2027*

Class XII (Higher Secondary) — **82%**
Science Stream

Class X (Secondary) — **84%**

ADDITIONAL STRENGTHS

- Comfortable working **In-office** in fast-paced teams; continuous learner who explores new languages, frameworks, and AI tools; supports teammates' learning.
- Basic understanding of **project management principles** — scheduling, tracking deliverables, and status reporting.
